

Apple Potholder

Instructions on Page 2

Use a piece of

### Apple Potholder Instructions

Add 1/2 inch around the edge for a seam allowance, then use the pattern above to cut two apple shapes. Put right sides together and add one or two layers of batting under the fabric. Sew around the outside edge leaving an opening to turn right side out. Clip around the curves and trim the batting before you turn the apple right side out. I used ribbon for the stem/hanger.

The leaf was made separately and applique'd in place.
